Patent

Amendment To The Claims

Please amend the claims as follows:

1. (original) A method for tracking checks through a mail system and a bank clearing system comprising:
 - obtaining a postal tracking identifier associated with a mail piece from a user;
 - receiving a check identifier associated with the mail piece;
 - receiving postal tracking data associated with the postal tracking identifier;
 - receiving check tracking data associated with the check identifier;
 - associating the postal tracking data with the check tracking data; and
 - sending the postal tracking data and the check tracking data to the user.
2. (currently amended) The method of claim 1, wherein,
the postal tracking ~~number~~identifier is a PIC code.
3. (currently amended) The method of claim 2, wherein,
the postal tracking ~~number~~identifier is received from a user.
4. (original) The method of claim 1, wherein,
the check identifier includes an ABA routing number, an account number and a check number.
5. (original) The method of claim 1, wherein,
the check identifier includes an identifier provided by a check tracking data center.
6. (original) A method for providing check tracking information to a user comprising:
 - obtaining a postal tracking identifier associated with a mail piece that includes a check;

Serial No.: 10/707,375

Patent

receiving check information identifying the check;
associating the postal tracking identifier with the check information;
receiving check processing information associated with second check
information;
receiving mail piece tracking information associated with the postal tracking
identifier; and
associating the mail piece tracking information with the check processing
information.

7. (original) The method of claim 6, further comprising,
 authenticating the user; and
 providing the mail piece tracking information and the check processing
 information to the user.
8. (original) The method of claim 6, further comprising,
 receiving the postal tracking identifier from a third party; and
 providing the mail piece tracking information and the check processing
 information to the third party.
9. (original) The method of claim 6, further comprising,
 obtaining a third tracking number associated with the check;
 receiving the third tracking number from a third party;
 receiving a pin code associated with the third tracking number from the third
 party; and
 providing the mail piece tracking information and the check processing
 information to the third party.
10. (original) The method of claim 6, wherein,

Serial No.: 10/707,375
Attorney Docket No.: F-628

Patent

the check processing information includes an indication of whether the check has been paid.

11. (original) The method of claim 6, wherein,

the check processing information includes a processing history including time stamps and an indication of whether the check has been refused.

12. (original) The method of claim 6, wherein,

the postal tracking identifier is a PIC code.

13. (currently amended) The method of claim 6, wherein,

the postal tracking ~~number~~ identifier is received from a user.

14. (original) The method of claim 6, further comprising

requesting the mail piece tracking information from a postal system server.

15. (original) The method of claim 6, further comprising

requesting the check processing information from a bank system server.

16. (original) A method for tracking checks through a mail system and a bank clearing system comprising:

obtaining a postal tracking identifier associated with a mail piece from a user;

receiving a check identifier associated with the mail piece;

receiving postal tracking data associated with the postal tracking identifier;

receiving check tracking data associated with the check identifier;

associating the postal tracking data with the check tracking data; and

sending the postal tracking data and the check tracking data to the user,

wherein the postal tracking number is generated by a mailing machine.
